**Table 1. Fatal occupational injuries by selected industry, Nebraska, All Ownerships, 2007**

Characteristic	All Industries <sup>1</sup>	Total (code T)
<b>Occupation:</b>		
Management occupations	17	17
Business and financial operations occupations	--	--
Computer and mathematical occupations	--	--
Architecture and Engineering occupations	--	--
Life, physical, and social science occupations	--	--
Community and social services occupations	--	--
Legal occupations	--	--
Education, training, and library occupations	--	--
Arts, design, entertainment, sports, and media occupations	--	--
Healthcare practitioners and technical occupations	--	--
Healthcare support occupations	--	--
Protective service occupations	--	--
Food preparation and serving related occupations	--	--
Building and grounds cleaning and maintenance occupations	--	--
Personal care and service occupations	--	--
Sales and related occupations	9	9
Office and administrative support occupations	3	3
Farming, fishing, and forestry occupations	--	--
Construction and extraction occupations	4	4
Installation, maintenance, and repair occupations	5	5
Production occupations	3	3
Transportation and material moving occupations	15	15
Military specific occupations <sup>8</sup>	--	--

<sup>1</sup>Mining includes fatalities at all establishments categorized as Mining (Sector 21) in the North American Industry Classification System, 2002, including establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in Oil and Gas Extraction.

<sup>2</sup>Persons identified as Hispanic or Latino may be of any race. The race categories shown exclude data for Hispanics and Latinos.

<sup>3</sup>Based on the 1992 BLS Occupational Injury and Illness Classification Manual

<sup>4</sup>The primary source of injury identifies the object, substance, or exposure that directly produced or inflicted the injury. For most transportation incidents, the primary source identifies the vehicle in which the deceased was an occupant. For most falls, the primary source identifies the surface or object contacted.

<sup>5</sup>The secondary source of injury, if any, identifies the object, substance, or person that generated the source of injury or that contributed to the event or exposure. For vehicle collisions, the deceased's vehicle is the primary source and the other object (truck, road divider, etc.) is the secondary source. For most homicides, the "bullet" is the primary source and the "perpetrator" is the secondary source. For most falls, the secondary source identifies the equipment or surface from which the worker fell.

<sup>8</sup>Military specific occupations include fatalities to persons identified as resident armed forces regardless of individual occupation listed.

NOTE: Dashes indicate no data or data that do not meet publication criteria. Totals for major categories may include subcategories not shown separately.

Data for 2007 are preliminary.
