

Comparison of Nebraska With Other Midwest Region States

In 2013, of the nine Midwest states reporting, Iowa registered the highest with a total case incidence rate for the private sector of 4.5 cases per 100 full-time employees. Illinois and Missouri recorded the lowest numbers with 3.2 cases.

Incidence rates by major industry division varied greatly between states. In manufacturing, the total case incidence rate ranged from 6.2 in Nebraska to 4.0 in Missouri. In the construction industry, the most hazardous of the major industry divisions, incidence rates ranged from 6.0 in Minnesota to 2.8 in Indiana.

Data was not available for North Dakota, South Dakota and Ohio.

**Occupational Injuries and Illnesses Per 100 Full-Time Workers

Nebraska Compared With the United States

In 2013, recordable occupational injury and illness cases in Nebraska’s private sector numbered 3.8 per 100 full-time employees compared with a U.S. rate of 3.3 cases.

Occupational Injuries and Illness by Industry Division State of Nebraska and the United States 2013		
Industry Division	Incidence Rates Total Cases	
	Nebraska	U.S.
Private Sector	3.8	3.3
Agriculture, forestry, fishing & hunting	4.6	5.7
Mining	3.4	2.0
Construction	5.0	3.8
Manufacturing	6.2	4.0
Wholesale trade	4.2	3.1
Retail trade	4.1	3.8
Transportation & warehousing	4.3	4.7
Utilities	*	2.1
Information	1.1	1.5
Finance and Insurance	0.7	0.7
Real Estate and Rental and Leasing	3.5	2.9
Professional, Scientific, and Technical Services	*	1.0
Admin, Support, Waste Mgmt and Remediation Services	2.3	2.7
Educational Services	1.5	2.0
Health Care and Social Assistance	5.1	4.7
Arts, Entertainment, and Recreation	3.3	4.8
Accommodation and Food Services	3.6	3.7
Other Services, except Public Administration	3.1	2.5

Incidence rates represent the number of injuries and illnesses or lost workdays per 100 full-time employees per year.

* No data available

Scope of the Survey and Technical Notes

Scope of the Survey

This survey covers employers in the following industries in the State of Nebraska:

Agriculture, Forestry, Fishing and Hunting.....	11
Mining.....	21
Utilities.....	22
Construction.....	23
Manufacturing.....	31-33
Wholesale Trade.....	42
Retail Trade.....	44-45
Transportation and Warehousing.....	48-49
Information.....	51
Finance and Insurance.....	52
Real Estate and Rental and Leasing.....	53
Professional, Scientific, and Technical Services.....	54
Management of Companies and Enterprises.....	55
Administrative and Support and Waste Management and Remediation Services.....	56
Educational Services.....	61
Health Care and Social Assistance.....	62
Arts, Entertainment, and Recreation.....	71
Accommodation and Food Services.....	72
Other Services (except Public Administration).....	81
Public Administration.....	92

Note on industry and occupation classifications: Beginning with the 2009 reference year, the Survey of Occupational Injuries and Illnesses (SOII) began using the 2007 North American Industry Classification System (NAICS). During reference years 2003 through 2008, the SOII program used the 2002 NAICS for industries and the Standard Occupational Classification (SOC) system for occupations. Prior to 2003, the program used the Standard Industrial Classification (SIC) system and the Bureau of the Census occupational classification system. Because of the substantial differences between the current and previous systems, the results by

industry and occupation in 2003 constituted a break in series, and users are advised against making comparisons between the 2003 industry and occupation categories and the results of previous years. All employees in these industries (e.g., part-time, full-time, casual, etc.) are covered in this survey. Excluded are self-employed individuals.

In addition, all agricultural production employers (NAICS 110000-115310) with 10 or fewer employees are excluded. The Federal Mine Safety and Health Administration provided data conforming to OSHA definitions for employers covered by the Federal Mine Safety and Health Act of 1977. The Federal Railroad Administration furnished data for any railroads.

The original survey sample consisted of 4,170 units. A portion of these were excluded because they were no longer in operation, were not within the scope of the survey, were included in the report for another location, received duplicate survey forms for the same location or the survey form was not mailable because of an inadequate address. When these exclusions were taken into account, the number of potential respondents was reduced to 3,774. Follow-up mailings and telephone calls to non-respondents resulted in 3,358 usable questionnaires, or a 89 percent response rate.

Survey Questionnaire

The survey questionnaire requested information concerning average employment during the calendar year 2013; total employee hours worked during 2013; the number of occupational injuries and illnesses by type (i.e., fatalities, lost workday cases, cases without lost workdays, and information on all lost workday cases). Under Federal grant arrangements, the respondent fills out a single reporting form which is used for developing both national and state estimates.

Occupational Safety and Health Definitions

Below is a link to the definitions of nonfatal occupational injuries and illnesses used in the annual survey. They are the same definition as those used by employers to keep logs of such incidents throughout the survey year.

<http://www.bls.gov/iif/oshdef.htm>

OSHA Injury and Illness Recordkeeping and Reporting Requirements

Under the OSHA Recordkeeping regulation (29 CFR 1904), *covered* employers are required to prepare and maintain records of serious occupational injuries and illnesses, using the OSHA 300 Log. This information is important for employers, workers, and OSHA in evaluating the safety of a workplace, understanding industry hazards, and implementing worker protections to reduce and eliminate hazards. OSHA is responsible for the administration and interpretation of issues related to recordkeeping and safety standards. Below is a link to the requirements.

<http://www.osha.gov/recordkeeping/index.html>

How to Compute a Firm's Incidence Rate for Safety Management

Incidence rates can be used to show the relative level of injuries and illnesses among different industries, firms, or operations within a single firm. Because a common base and a specific period of time are involved, these rates can help determine both problem areas and progress in preventing work-related injuries and illnesses. The Bureau of Labor Statistics (BLS) has developed instructions, which may be accessed at the link below, to provide a step-by-step approach for employers to evaluate their firm's injury and illness record.

<http://www.bls.gov/iif/osheval.htm>

Table 1. Incidence rates¹ of nonfatal occupational injuries and illnesses by selected industries and case types, Nebraska, 2013

Industry ²	NAICS code ³	Total recordable cases	Cases with days away from work, job transfer, or restriction			Other recordable cases
			Total	Cases with days away from work ⁴	Cases with job transfer or restriction	

¹ Incidence rates represent the number of injuries and/or illnesses per 100 full-time workers and were calculated as: $(N / EH) \times 200,000$ where,

N = number of injuries and/or illnesses
 EH = total hours worked by all employees during the calendar year
 200,000 = base for 100 full-time equivalent workers (working 40 hours per week, 50 weeks per year).

² Totals include data for industries not shown separately.

³ *North American Industry Classification System* -- United States, 2007.

⁴ Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

⁵ Excludes farms with fewer than 11 employees.

⁶ Data for mining (Sector 21 in the North American Industry Classification System, 2007 edition) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes OSHA made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

⁷ Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

⁸ Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

⁹ Data too small to be displayed.

NOTE: Dashes indicate data that do not meet publication guidelines. Because of rounding, components may not add to totals.

Table 2. Numbers of nonfatal occupational injuries and illnesses by selected industries and case types, Nebraska, 2013

(In thousands)

Industry ¹	NAICS code ²	Total recordable cases	Cases with days away from work, job transfer, or restriction			Other recordable cases
			Total	Cases with days away from work ³	Cases with job transfer or restriction	

¹ Totals include data for industries not shown separately.

² *North American Industry Classification System* -- United States, 2007.

³ Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

⁴ Excludes farms with fewer than 11 employees.

⁵ Data for mining (Sector 21 in the North American *Industry Classification System*, 2007 edition) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes OSHA made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

⁶ Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

⁷ Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

⁸ Data too small to be displayed.

NOTE: Dashes indicate data that do not meet publication guidelines. Because of rounding, components may not add to totals.

¹ Incidence rates represent the number of injuries per 100 full-time workers and were calculated as:
(N/EH) x 200,000 where

N = number of injuries
EH = total hours worked by all employees during the calendar year
200,000 = base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

² Totals include data for industries not shown separately.

³ *North American Industry Classification System* -- United States, 2007.

⁴ Excludes farms with fewer than 11 employees.

⁵ Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2007) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Table 6. Incidence rates¹ of nonfatal occupational injuries and illnesses by industry and case types, Nebraska, 2013

Industry ²	NAICS code ³	Total recordable cases	Cases with days away from work, job transfer, or restriction			Other recordable cases
			Total	Cases with days away from work ⁴	Cases with job transfer or restriction	

¹ Incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as: $(N/EH) \times 200,000$ where

N = number of injuries and illnesses
 EH = total hours worked by all employees during the calendar year
 200,000 = base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year).

² Totals include data for industries not shown separately.

³ *North American Industry Classification System* -- United States, 2007.

⁴ Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

⁵ Excludes farms with fewer than 11 employees.

⁶ Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2007) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

⁷ Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

⁸ Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

⁹ Data too small to be displayed.

NOTE: Because of rounding, components may not add to totals. Dash indicates data do not meet publication guidelines.

Table 7. Numbers of nonfatal occupational injuries and illnesses by industry and case types, Nebraska, 2013

(In thousands)

Industry ¹	NAICS code ²	Total recordable cases	Cases with days away from work, job transfer, or restriction			Other recordable cases
			Total	Cases with days away from work ³	Cases with job transfer or restriction	

¹ Totals include data for industries not shown separately.

² *North American Industry Classification System* -- United States, 2007 Edition

³ Days-away-from-work cases include those that result in days away from work with or without job transfer or restriction.

⁴ Excludes farms with fewer than 11 employees.

⁵ Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2007) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

⁶ Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

⁷ Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

⁸ Data too small to be displayed.

NOTE: Because of rounding, components may not add to totals. Dash indicates data do not meet publication guidelines.

Industry ²	NAICS code ³	Incidence rates per 10,000 full-time workers ¹					
		Total cases	Skin disorders	Respiratory conditions	Poisonings	Hearing loss	All other illnesses

¹ Incidence rates represent the number of illnesses per 10,000 full-time workers and were calculated as: $(N/EH) \times 20,000,000$ where

N = number of illnesses □
 EH = total hours worked by all employees during the calendar year □
 20,000,000 = base for 10,000 equivalent full-time workers (working 40 hours per week, 50 weeks per year). □

² Totals include data for industries not shown separately.

³ *North American Industry Classification System* -- United States, 2007.

⁴ Excludes farms with fewer than 11 employees.

⁵ Data too small to be displayed.

⁶ Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2007) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. ¹ Totals include data for industries not shown separately.

² *North American Industry Classification System* -- United States, 2007.

³ Excludes farms with fewer than 11 employees.

⁴ Data too small to be displayed.

⁵ Data for mining (Sector 21 in the *North American Industry Classification System* -- United States, 2007) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

⁶ Data for mining operators in this industry are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded. These data do not reflect the changes the Occupational Safety and Health Administration made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

⁷ Data for employers in rail transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

NOTE: Because of rounding, components may not add to totals. Dash indicates data do not meet publication guidelines.

¹ Incidence rates represent the number of injuries and illnesses per 100 full-time workers and were calculated as: (N/EH) x 200,000 where □

N = number of injuries and illnesses □
 EH = total hours worked by all employees during the calendar year □
 200,000 = base for 100 equivalent full-time workers (working 40 hours per week, 50 weeks per year). □

² North American Industry Classification System -- United States, 2007.

³ Excludes farms with fewer than 11 employees.

⁴ Data for mining (Sector 21 in the North American Industry Classification System, 2007 edition) include establishments not governed by the Mine Safety and Health Administration (MSHA) rules and reporting, such as those in oil and gas extraction and related support activities. Data for mining operators in coal, metal, and nonmetal mining are provided to BLS by the Mine Safety and Health Administration, U.S. Department of Labor. Independent mining contractors are excluded from the coal, metal, and nonmetal mining industries. These data do not reflect the changes OSHA made to its recordkeeping requirements effective January 1, 2002; therefore estimates for these industries are not comparable to estimates in other industries.

⁵ Data for employers in railroad transportation are provided to BLS by the Federal Railroad Administration, U.S. Department of Transportation.

⁶ Days-away-from-work cases include those that result in days away from work with or without restricted work activity.

⁷ Data too small to be displayed.

NOTE: Because of rounding, components may not add to totals. Dash indicates data do not meet publication guidelines.
